

Standard Schedule for Grading Cities and Towns of the United States: With Reference to Their Fire Defenses and Physical Conditions (Classic Reprint)

Excerpt from Standard Schedule for Grading Cities and Towns of the United States: With Reference to Their Fire Defenses and Physical Conditions This super-deficiency is to be added to the deficiency determined by the application of the Schedule proper. A good water supply in connection with a poor fire department, or vice versa, is of less value than if both are good. In recognition of this, a modification of the better one of the two features is made, in accordance with the plan given on page 80, provided the divergence exceeds the equivalent of three classes. The subjects considered in grading the various features are given on pages 4 to 8 and the details of grading on the pages following; the total of the points of deficiency is used in determining the class of the city or town graded, in accordance with the plan given on page 9. In determining the points of deficiency to be applied to many of the items, it appears reasonable to use a graduated scale of points depending upon the percent, of deficiency, with a lesser increment for the first 30 percent, than for the remainder; that is, a deficiency of 10 percent, in good or moderately good conditions has less actual effect than where conditions are poor. Such a scale has been prepared and is given below; either the full scale, a multiple or a fractional part thereof is used, depending upon the relative weight or importance of the item under consideration. To save space, this Scale is printed in full on page 3, and reference is made to it under each item to which it applies. In all items, the total required quantity or the total required number must be used as the basis in figuring the percentage of deficiency, except that in Water Supply, if there is a deficiency under Item 60, the quantity available on which this deficiency was obtained shall be used as a basis in figuring the percentage of deficiency of Items 7 to 16, inclusive, except for the Item on which

the inadequacy occurs, in which case the total required quantity will be used. In Items i, 2, 12, 15, 17, 19, 20, 21, 23, and 26 of Fire Department the deficiency shall be on the basis of existing companies. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
